

The background of the slide is a photograph of ocean waves. The top half shows the surface of the water with white foam from breaking waves against a dark blue sky. The bottom half of the slide is a solid, lighter blue gradient.

DIVING IN GALAPAGOS

A scuba diver in a black and blue wetsuit is swimming over a rocky reef. The diver is wearing a mask, regulator, and has a yellow strap with the word "Igloo" on it. Bubbles are rising from the diver's regulator. The reef is covered in coral and many small fish are swimming around. A large shark is swimming in the foreground on the right. The background is a deep blue ocean with more fish.

DIVING

Floreana
North
Seymour

CORMORANT FLOREANA

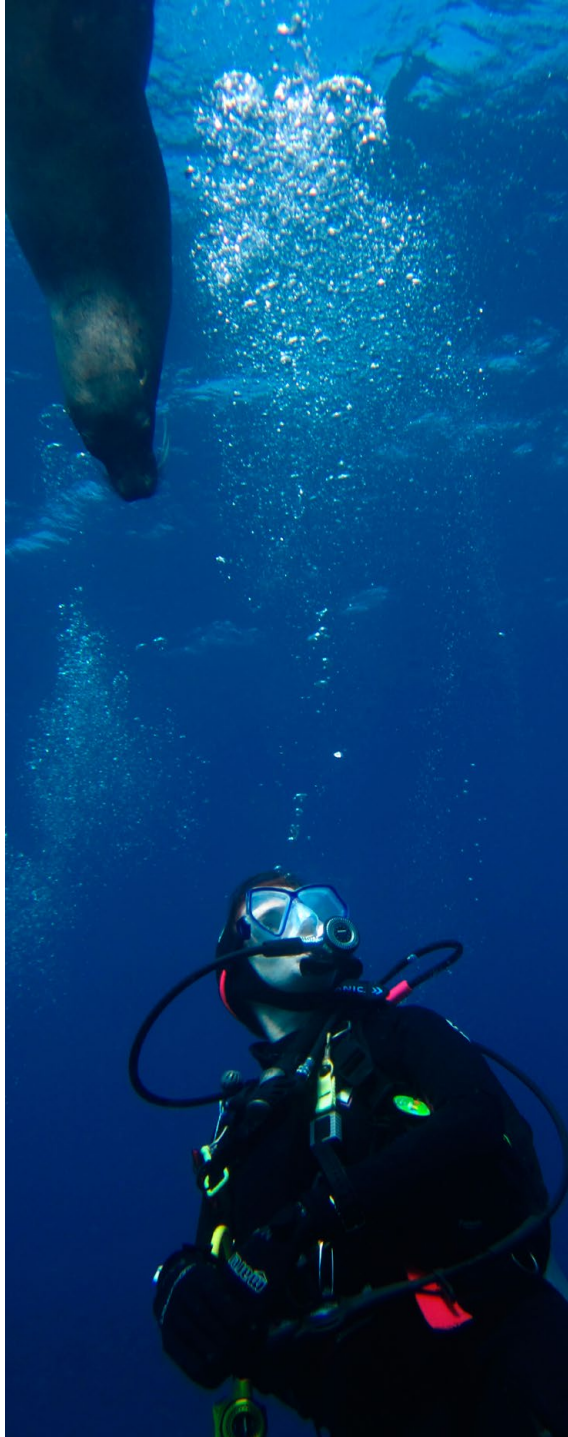

CORMORANT POINT

We Dive first in Cormorant Point where guest will have the best chance to spot the Red Lipped Batfish.

An incredible amount of small fish, Scalloped hammerhead sharks also can be spotted as well as School of golden and Eagle rays, and lots of tropical fish.

FLOREANA CHAMPIONS

CHAMPION

The second Dive will be at Champion Islet, this is an amazing site. Guest will experience a natural aquarium with big schools of fish all over around, very colorful site.

The best experience at this site is to immerse yourself in the middle of a Black stripe Salema school and finally the most regarding experience at this site will be playing around with the Galapagos sea lions.

NORTH SEYMOUR

CANAL SEYMOUR

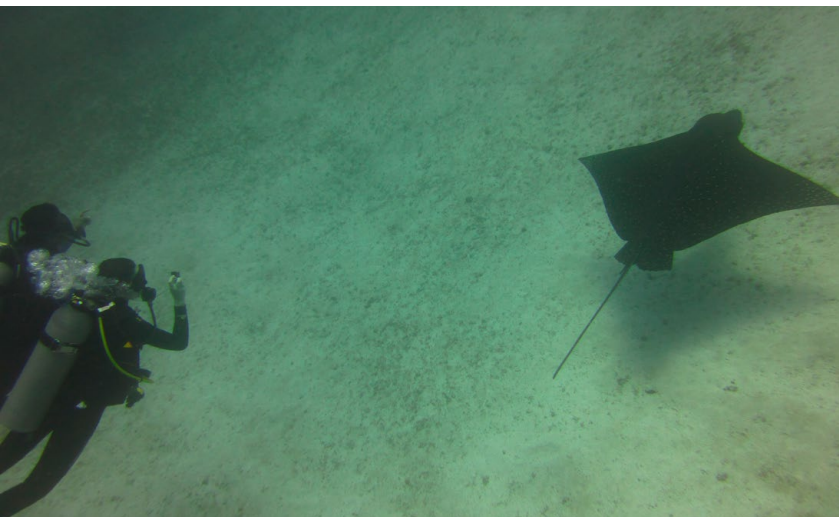

Canal Seymour

North Seymour canal Diving site is perfect for beginners and for a discovery diving experience, the Channel has a mild current that will drift divers effortlessly although currents can get strong depending on weather conditions. On the sandy bottom a Gathering of Galapagos garden eels can be seen from above, the highlight of this site will be the Hammerhead sharks that can be spotted in some impressive schools.

NORTH SEYMOUR

ZONA NOR-ESTE

North East Inner Channel

This is a more protected area from currents, it is a cleaning station for white tip sharks, black tip sharks that can be spotted in large schools, very unique experience. Schools of eagle ray Rays can
